

Welcome to the Workshop,

Beam Lines and Instrumentation 4 – ‘BLIN4’

We thank you for your participation today

Katia, Joerg and Paul at LMU

BLIN4 Programme and Talks:

- programme and abstracts - click the **BLIN4** link at <https://www.alpa.physik.uni-muenchen.de/>
- programme:
(23 talks in four sessions)
(morning and afternoon 30 minute breaks)
(one hour lunch break)

1.	Beam Lines	(6 talks)
2.	Instrumentation (Particle and Photon)	
2.1	Source Characterization	(7 talks)
2.2	Beam Diagnostics	(7 talks)
2.3	Diagnostics Specific to Applications	(3 talks)
- very important to rigorously follow the schedule of talks as specified in the final programme:
 - each talk is a 15 minute summary: we suggest **10 min. (talk) + 5 min. (Q&A)**
 - we will need to stop your presentation when the total duration exceeds 15 minutes
- no time to address unforeseen technical problems; so, as much as possible we have posted slides to the webpage (as a backup for today but also to document this meeting): **if you have not yet sent us your slide set (or have not sent updated slides following recent changes), please send us your presentation slides today** and (if preferred) you can even provide a fuller slide set typical of a longer presentation
- although this remote format is not optimal, you do have opportunity throughout today (and likely after) to directly contact speakers with questions – we encourage continuation of these informative exchanges and we have therefore asked speakers to provide their email address (preferably) in their final slide
